[AW Extra 9/20/12 Router Table Box Joints | Popular ...](#)  
This jig is designed to make 1/2 in. box joints in stock up to 5 in. wide. It's dedicated to only one size of router bit. To make wider or narrower box joints, you must build another jig. For box joints wider than 1/2 in., you're better off using a tablesaw and a different kind of jig. If your project requires box joints that are more than 5 in. wide, widen the jig accordingly.

[Build a Basic Box-joint Jig - WOOD Magazine](#)  
Basic box-joint jigs like this one have been around for a long time. After you finish building and adjusting the jig, learn how to get the most from it. To use this jig you will need a tablesaw, stackable dado set, and a calipers with dial or digital readout.

[Make Perfect Box Joints With a Table Saw Jig](#)  
Slide the box joint jig a bit to the right, using the remaining portion of the spacer block that you cut off in the previous step to adjust the width of the jig. See the image above for clarification. With the jig positioned so that the installed spacer block is now precisely one box joint finger's width past the dado blade, re-attach the backer block to the miter gauge using the two screws.

[How to Make a Box Joint Jig for the Router Table](#)  
The jig assembled well and worked at least as well on the router table as it does on the table saw. In fact, with a fairly sharp bit, the cuts seem to be a little bit crisper and there is less

[Router Workshop: Easy To Make Box Joints & Dovetails!](#)  
Setting Up For Box Joints. Be sure the router is unplugged. To set up for 3/8 box joints, chuck up the 3/8 spiral (straight) bit in a table mounted router.

[Box \(finger\) Joint Jig: 9 Steps \(with Pictures\)](#)  
This box joint will be set precisely to do half-inch cuts. You could make it do wider or narrower cuts, but it will be fixed to whatever width you build it as. Any table saw that works with a dado bit will almost certainly support a half-inch wide groove. If you decide to build your jig to a

[Rockler Router Table Box Joint Jig | Rockler Woodworking ...](#)

BEST ANSWER: As per the specs of the box joint jig, Near edge of router table's miter track must be between 4-1/2" and 6-1/4" from the center of the router bit. Also the miter slot must measure 3/4 wide by 3/8 deep. I have a royobi router table and the first spec was alright but the miter slot

[Five Box Joint Jig Reviews - Woodworker's Journal](#)  
Rockler's Box Joint Jig has a 1/2"-thick MDF base that's positioned over the router bit on a router table, then locked in place using two 3/8 x 3/4 metal miter slot bars and star knobs. Make sure the miter slot on your router table is within 4-1/2 to 6-3/8 from the center of the router bit; more or less span will exceed the base's range of adjustability.
