Can you do a Manual J HVAC calculation in less than 60 ...

HVAC contractors use a Manual J calculation to determine the heating and cooling loads of a home or building, and recommend the capacity of HVAC equipment needed. It's one of the tools published by the Air Conditioning Contractors of America to help HVAC contractors design a heating and air conditioning system. A new online tool lets contracts complete the complex task in about a minute.

HVAC Design Done Right - Manual J, S, T, & D
One of the biggest lessons I've learned is that HVAC design is a lot more than Manual J. Most HVAC contractors, home energy raters, and others in this field know about Manual J. Many people even know about Manual D, which describes how to design the duct system. Load Calculations | HVAC Design | Energy Vanguard
Manual J HVAC load calculations determine how much heating and cooling a house actually needs. It used to be performed by engineers with pen, paper, and slide rules; now it's almost always done with computer programs. This is a commitment of time and effort (e.g. money) so you can see why contractors developed rules of thumb.
